

Zaporizhzhia Situation Center

Country: Ukraine

City: Zaporizhzhia

Areas: Government,
City Safety,
Police, Violations, Monitoring Rooms

The Zaporizhzhia Situation Center is a control organization, where online monitoring of the situation in the city is carried out using a video surveillance system. Center employees monitor the places of the greatest concentration of people, and objects requiring increased attention from the public safety aspect. Recently, Zaporizhzhia residents had the opportunity to report violations that occur in the city to the Situation Center workers. Zaporizhzhia residents can apply for violations of city landscaping, thefts, and administrative violations.

Customer Pain Points:

- No crowd's detection system.
- The difficulty of tracking the crowd's movement.
- No tracking of criminal crowds which can move around the city or town.
- Absence of crowd's fixation
- Absence of reports about the crowds
- NO VMS Systems

Our Solution – VEZHA Crowd Detection

The Crowds module was chosen and improves the following to update the work quality :

- Many crowds through the city were captured and detected.
- Many reports about the crowds were analyzed.
- Crowd detection helps to find violators and prevent crimes.
- Ability to send notifications helps to inform about the dangerous crowd.
- The Situation Center is able now to generate statistical reports on crowds

Hardware Requirements:

In way to organize the hardware for different analytics, 1 server was assembled with the following characteristics for analytics and virtual machine:

Middleware	
Middleware core	
Database	
MQ Server	

CPU	Intel(R) Xeon(R) Silver 4114 CPU @ 2.20GHz
RAM	16 GB
Operating system	Ubuntu 18.04.3 LTS (Bionic Beaver)

2 analytical servers with the following characteristics:

CPU	Intel(R) Xeon(R) Silver 4110 CPU @ 2.10GHz (2)
RAM	126 GB
GPU	nVidia RTX 2080 ti 11GB
Operating system	Ubuntu 18.04.3 LTS (Bionic Beaver)

And one more server for storage: based on Dell EMC PowerScale.

User Rights

Since the situation center is a large structure, where each employee has access only to his data and modules, the VEZHA system provides many roles for different employees. These are administrator, inspector, manager, user, view analytics roles. Each role is a set of access rights enabled for a specific user.

Milestone Integrations

The screenshot shows the 'Crowd detection analytics' interface. It features a search bar with 'Camera' and 'Status' dropdowns, and buttons for 'Search', 'Reset', and 'Add analytics'. Below is a table with columns for ID, Status, Camera, and Start/Stop actions.

ID	Status	Camera	Start	Stop
862	Stopped	Univermag Square	Start	Stop
844	Stopped	9304	Start	Stop
821	Stopped	9305	Start	Stop
812	Stopped	Камера 14_585_гитост	Start	Stop
999	Stopped	Немиров	Start	Stop
569	Stopped	Object/Crowds/Motion Detection, Cyprus	Start	Stop
559	Stopped	Универмаг парковка	Start	Stop
329	Stopped	Romcat	Start	Stop
203	Stopped	AMS	Start	Stop
202	Stopped	Номера Зупинка Лисопарк 2	Start	Stop
178	Stopped	Dahua DVR(Склад, ПММ)	Start	Stop
66	Stopped	Dahua	Start	Stop
61	Stopped	IQ office LND-6070	Start	Stop
64	Stopped	Министерство внутренних дел	Start	Stop

- Incoresoft VEZHA works in security systems of safe and smart cities with a big flow of people on streets and roads.
- Using the Milestone Integration and Crowds Plugin all staff of the situational center can use the solution as VMS, also detect crowds of different sizes.
- While tracking the criminals, the situational center can find them using the crowd's module.
- Using VMS, the staff can find not only the photo, time, and place where the crowd is fixed at the time of the violation, but also give an example of video at the same. Milestone XProtect, VEZHA Crowds Plugin for Milestone XProtect, and directly added video streams are installed on every computer.
- The plugin has a direct connection with the server, updates are made weekly thanks to the VEZHA specialists, which allows to always have a new updated version of the software.

The screenshot shows the 'Events' interface. It includes search filters for 'Camera' (set to 'All') and 'Period'. Below the filters is a table with columns for Camera, Date, Video, and Accepted by.

Camera	Date	Video	Accepted by
Univermag Square	09-02-2021 11:04:25	[Video Icon]	Accept
Univermag Square	09-02-2021 11:03:13	[Video Icon]	Accept
Univermag Square	09-02-2021 11:01:10	[Video Icon]	Accept
Univermag Square	09-02-2021 10:43:24	[Video Icon]	Accept
Univermag Square	09-02-2021 10:41:53	[Video Icon]	Accept
Univermag Square	09-02-2021 10:25:50	[Video Icon]	Accept
Univermag Square	09-02-2021 10:22:26	[Video Icon]	Accept
Univermag Square	09-02-2021 10:15:28	[Video Icon]	Accept

Our Solution Advantages:

- Immediately notifying about the crowd situation/location
- Flexibility to set a minimum number of peoples in crowd detection.
- Unlimited lists quantity with different rules
- Crowd detection in bad weather conditions
- Simple integration without any special settings
- Simple settings and interface
- User rights for specific user group
- Full team support and updates

Conclusion

Incoresoft has implemented an efficient search system for crowd detection in a way to prevent crimes on the road.

According to the National Police of Ukraine, for the first half of 2019, the use of the Crowds module helped more then 500 crimes in a city with a population of 740,000 inhabitants. At the moment, we are talking about expanding the number of licenses for the entire city.
